Hundreds sprang to their feet and shouted, and the structure shook with the mighty inquiry of human passion. The electrician had penetrated to the human soul, and, in spite of all political prejudices, the common sentiment of liberty smote like a hand of iron on the heart. No person could have he rd that tremendous sentence, and seen the full splendors of perfected oratory, without yielding to the mighty influences which used to make the market-place of Athens tumultuous, and the forum of Rome immortal. Fifty thousand dollars have been sent from New York to the Pope. PHILADELPHIA, Oct. 4 .- Rembrandt Peale, the

eminent painter, died this morning, aged 83 years. The Postmaster General has issued an order that after the 1st of November all unpaid letters will be sent to the dead letter office, the practice of notifying the writers thereof not having had the desired effect of preventing their accumulation. In New York there is so much trouble about set-

Capt. Leitch and Mr. Cox, a passenger, landed at Scituate this morning and arrived at Boston at 11 o'cluck. It is supposed the fire had been smouldering for a long time, from the rapid progress made by the flames after being discovered. The Connaught is valued at

The fiftieth annual meeting of the American Board of Commissioners for Foreign Missions began its session on Tuesday, in Boston. In the evening, an elaquent discourse was preached by Rev. S. W. Fisher of the debt of \$66,000, and leaving \$1400 in the treasnry. Reports were read by the Secretaries concerning the Missions, which are generally prosperous. It is estimated that six thousand friends of the Board | permit this. are entertained as guests of the citizens of Boston. One of the Secretaries made the following statement of the summary of the half century. The Board's five ordained missionaries sent forth into the heathen world in 1812 have been followed by others to the number of 410. The eight males and females composing the first company of missionaries, now stand associated on the historic page with a company of 1257. Of these a third are now in the field, aided by 500 native belpers, and 400 teachers connected with some 26 more than a thousand for every year of its existence. The average admissions into these churches, annually, during the last ten years, has been 1500, a larger number of communicants than could be accommodated with seats in the greater part of our church

During all these years the educational department had received a large share of attention. Full 19,000 children and youth, on an average, male and female, have been taught in our mission schools during the past ten years, including the Sandwich Island free schools only for a portion of this time. As many as 175,000 must have been in the schools since the commencement of the enterprise, and some thousands of these have enjoyed the advantages of our seminaries

The spread of printing establishments in distant hads has enabled the board to dispense with five of its ten offices in ten years. The present annual printing for our missions, chiefly at the charge of Bible and Tract Societies, is not far from 50,000,000 of pages, and the number of pages printed from the beginning, cannot fall much short of 1,500,000,000. It is with this gratifying enlargement of our system and work, that we close the first half century, and enter upon the second. Some of the younger persons present may live to see the close of that. Who will venture to conjecture what they will be permitted to

POLITICAL .- Mr. Yancey spoke at the Cooper Institate, New York, on the 10th, to an immense gathering of people. While speaking, the question was put to him whether Lincoln's election would be cause for the secession of the South. To which he replied that he believed in the right of secession, and if Lincoln should bring in Federal bayonets to aid his " irrepressible conflict" he would join his State to resist. PENNSYLVANIA .- According to the correspondence

received by the Pony, the majorities at the late Gubernatorial Election in Pennsylvania stand-Custin, (Rep.) 51,306; FOSTER ((Dem.) 19,228-Custin's majority, 32,088. Outo Election .- For Congress, 13 Republicans

and 8 Democrats; the Republicans carry the State by about 75,000 majority.

The New York Herald gets out of the way of the Republican wagon as follows: "There is no question of a doubt but that the recent election in Pennsylvatia settles the Presidential question, and places Abrahum Lincoln in the Presidential chair. Our New York merchants and financiers may as well look this fact fairly and squarely in the face, for no other version can be placed upon the result in the Keystone State. The best thing that they can now do is to look is up, gentlemen, look at it as you will."

A FRENCH BILLIARD PLAYER IN NEW YORK -The arrival of Mons. Berger in New York, has created quite an excitement, and the few exhibitions that gentleman has given, have impressed everybody, and none more so than the redoubtable Phelan himselfthough no match game has yet been played between them. Those who have seen Berger, say he can beat Phelan easily. On the 1st inst , Berger displayed his skill to a select audience. His most difficult performare made by holding the cue perpendicularly, and striking the player's ball with such nicety as to cause him to the Eternal City. it to twist to any desired part of the table, to jump, rom, make cushion-shots, acute angles, and, indeed, perform the most eccentric journeys. In one of these he causes the ball to leap upon the cushion, and traveling in an arched line upon the frame of the table, to pass again upon the bed, and carom on the reds. or Washington .- On Saturday, Lord Renfrew and suite, with the President, members of the cabinet, Miss Lane, and a few invited guests, embarked on board the U. S. steamer Harriet Lane, and proceeded to the Tomb of Washington at Mount Vernon. The toyage occupied about an hour and a half. In order that the distinguished visitors might not be intruded upon by the prying curiosity of a throng of visiters, orders had been issued that the grounds should be to the protection of a genuine Italian power. closed to the public. Upon arriving at Mount Vernon the visitors were received by Mrs. Piggs, vice regent of the Mount Vernon association, and escorted to the home of Washington. This they examined sand, divided into fifty-four parishes, with 1,280 annutely, entering every apartment and inspecting with much interest the relies which were there deposited. The key of the Bastile, presented by Lafayette, attracted much attention from the royal party. A special despatch to a morning contemporary says: The day was all that could be desired, the finest that the Indian summer could give. Having carefully inspected the house, the Prince stood reverently uncovered in the room in which Washington died, and looked at the piano which he presented to Mrs.

THE DASHAWAY ORATOR.—Perhaps the most gifted you see a neat, well kept establishment of this kind, of living craters is John B. Gough, the great Apostle | With a gentlemanly and intelligent proprietor, you of Temperance, who has but recently returned from | may be sure you are in the midst of an intellectual, several years residence in Europe. He has, since his brother of the eminent Publisher and Bookseller, rest to yourselves, and relief and health to your infants. Perreturn, delivered an address in New York, which is conceived the idea of taking Stationery and making | neetly safe in all cases. See advertisement in another column, thus graphically described by the World:

"The discourse was illustrated with theatrical tableaux, clever compliments to the ladies, neat chimes on the pleasant metal of Democracy, little touches of the tenderest and most natural affections, funny stories, solemn calls on God the Father, and the Son, coptous anecdotes of himself, and the intercourse he had in England with persons of rank, and proud reminiscences of the blessings invoked upon his head, by poor creatures he saved from destruction. It was a strange mosaic of honest zeal and unshrinking junior partner in the firm. vanity, of keen philosophy and extravagant assumption. The stream of his passionate elequence flowed being a town of any consequence in California, Orepast scenes of touching desolation, crowded with gloomy figures of despair. He drew the picture of belated and cursing hags, whose fierce nature his kindness subdued and softened, in the streets and cellars of Dandee; of mothers praying for their poor boys; of pale sisters stitching their lives away to support drunken brothers; of husbands and wives brought together, after a separation of years, and made happy by a simple pledge; of harlots and suicides. And showed a sympathy with all the feriorn humanity. The audience lay like a nerve before the orator. There were moments when sobs swept from end to end of the Hall. Men and women wept and shouted STEAMSHIP CONNAUGHT BURNED.—The steamship like children. When the applause came, it was like a storm. And when the speaker tried to stop, cries

PROSPECT OF A ECROPEAN WAR .- The New York Tribune expresses the opinion that the twenty millions of united Italians will at once rush upon Venetia; that Austria will thereupon declare war against Sardinia; that the fleet of Young Italy will forthwith transport a revolutionary expedition to the coast of Dalmatia, and that Koss th will once more arouse Hungary to a struggle for liberty and nationality. Then if the Czar should once more cast the heavy sword of Russia into the Austrian scale, Louis Napoleon will be compelled to march to the defense of Italy. and thus the flames of war will sweep from Etna to the Caucasus. Manifestly, the events of 1861 will be more momentous than those of 1859 or of 1860. The elder Napoleon's prediction, that "Within half a century, Europe will have become Republican or Cossack," extravagant though it was, seems again in in a fair way toward realization. Should Louis Napo-Hamilton college, N. Y. The Treasurer's report was | leon permit the Austrians to re-establish the absolute read, acknowledging \$429,000 received, cancelling sway of the Pope and the King of Naples over the fairer half of Italy, his prestige is gone forver, and his throne will crumble at the first breath of popular discontent. A PRODUCTOUS TREASURE FOR FRANCE.-Napoleon, if the New York Herald is to be believed, has indeed a good thing in hand. Many doubtless have seen that paper's late great sensation item about the discovery some seven years ago by Mr. Parrish, an American citizen, of immense gold fields in the Kong Mountains, in Africa, not very far distant from the French colony of Scnegal. Mr. Parrish offered to lay his secret before the American Government, and afterwards before the merchant princes of New York ; For sale by missions. This was in 1853. The Herald goes on to say that the Emperor immediately announced a multitude of decrees reconstructing the colony of Senegal, ordering out a military force and taking other neasures to put the country more firmly into the Government's hands. The mines were worked vigrously, and ever since they have silently poured in to the Imperial treasury about 500,000,000 francs per annum, which is more than the yearly product of California and Australia combined. For the whole seven years the secret has been kept from the rest of the world. The Herald tells this remarkable story evidently in good faith, and supports it with several specious reasons, the chief of which is a statistical statement of the operations of the French mint, showing for several years past a coinage greatly superior o that of England and the United States The most neredible part of the story is that the Emperor has angratefully failed to pay Mr. Parrish his promised 5,000,000 francs, and that the latter is about to apdy to the United States Government for aid in inluencing the Imperial defaulter to pay up.

The latest Eastern news makes known that the French Emperor has ordered two divisions to Italy with the understood purpose of staying the progress of Garibaldi. The intelligence will be displeasing to the friends of the Liberator, who, from other portions of the world, have watched his successes with absorbing interest. How great soever may be the va-lor of Garibaldi, he will not be able to resist the combined Catholic powers, of which the action of the French Emperor is doubtless an exponent, and who have resolved to prevent the conquest of the Papal States. The next intelligence from Italy will be of greater interest than any preceding.

THE POPE'S PROTEST .- A summary of the Pope's allocation of the Consistory, of 28th, is published. He reproves and condemns in stringent terms the detestable attack on the Church and Government by Piedmont. Fifty-four are Italians, sixteen foreigners. Six of the foreign Cardinals are of France, three of Austria, two of Spain, two of Portugal, one of Belgium, one of England, and one of Prussia. Twenty-seven Cardinals (Italians) reside in Rome, and assist the Pope in the spiritual government of his Church, and in the temporal government of the Pontifical States. The civ-I list of Rome costs about \$690,000. The salaries of the higher officers do not exceed three thousand dollars. HEALTH, STRENGTH AND HAPPINESS are obtained by cleansing the blood of its impurities. Blood, we are told, on the highest authority, is the "Life," or at least the medium of Life to the Body; and it is, we know, the great feeder of every part of the frame. Thus the blood is the great channel of discuse: consequently, a good or bad state of the system, or constitution, is no more or less than a good or bad state of the blood. We have made the composition of the blood our study, and are satisfied that two-thirds of all diseases are

caused by its impurities. Believing the above facts, we made ourselves acquainted with the stoop cumulcatty with a view to a reliable medicinal agent, that would correct all impurities of the blood, and at the same time effectually core all diseases arising therefrom. We have succeeded beyond our most subgains expectations, as thousands can testify who have tried the virtues of the preparation known by all professional men as
